

ESTRUCTURA DE BASE DE DATOS

Proyecto: Taller Villanueva - Sistema de Gestión

1) Tabla: users

- id (string, PK)
- fullName (string)
- username (string)
- role (enum: Administrador | Empleado)
- status (enum: Activo | Inactivo)
- lastAccess (string/ISO date)
- password (string)

2) Tabla: clients

- id (string, PK)
- type (enum: Persona Natural | Empresa)
- name (string)
- ruc (string)
- address (string)
- district (string)
- phone (string)
- email (string)
- status (enum: Activo | Inactivo)
- activeWorks (number)
- contactPerson (string, nullable)

3) Tabla: works

- id (string, PK)
- name (string)
- clientId (string, FK -> clients.id)
- clientName (string)
- type (string)
- status (enum: Presupuestando | En Progreso | Finalizado)
- progress (number)
- totalValue (number)
- startDate (string/date)
- dueDate (string/date)
- delayDays (number)
- description (string)
- location (string)
- budget (BudgetItem[])

4) Subestructura: budget item (dentro de works)

- id (string, PK logica)
- materialId (string, FK -> materials.id)
- materialName (string)
- quantity (number)
- unitCost (number)

5) Tabla: materials

- id (string, PK)
- code (string)
- name (string)
- description (string)
- category (string)
- unit (string)
- averageCost (number)
- stock (number)
- stockMin (number)
- stockMax (number)
- location (string)

6) Tabla: payments

- id (string, PK)
- workId (string, FK -> works.id)
- clientId (string, FK -> clients.id)
- amount (number)
- date (string/date)
- dueDate (string/date)
- status (enum: Pagado | Pendiente | Vencido)

RELACIONES PRINCIPALES

- clients (1) ---- (N) works
- works (1) ---- (N) payments
- clients (1) ---- (N) payments
- works (1) ---- (N) budget items
- materials (1) ---- (N) budget items
